IN LESS TIME THAN IT  
TAKES TO READ THIS  
BROCHURE YOUR HOME  
COULD BE BURGLERD!

**Rest  
assured  
there is  
another  
way**

**Voted the world's  
best cloud security  
software and the fastest  
residential alarm system**

**webeye**  
CTIS™

**webeyeassured**

**RAPID**

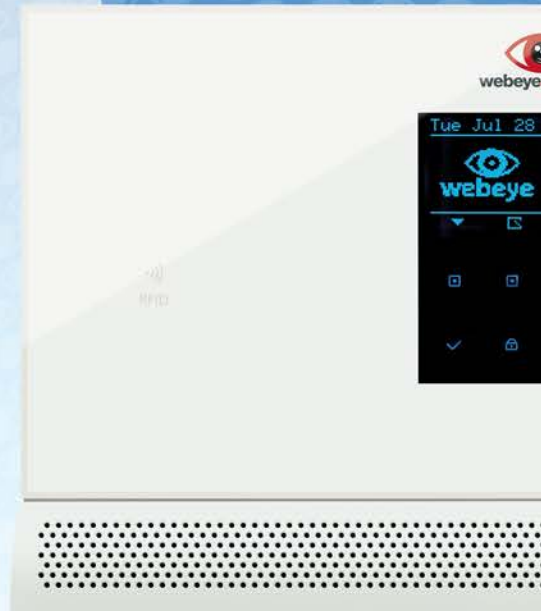

The fully monitored  
automated key holder  
response system

**webeyeassured RAPID combined with webeyecms offers a new concept in residential security. Home owners and small businesses now have a professional, reliable and efficient solution which monitors and secures their property at a fraction of the cost of a traditional security system using a manned monitoring station.**

### **SUPER-FAST, RELIABLE AND SECURE**

In home security speed and reliability is of the essence to catch the criminal! In response we have designed the **webeyeassured RAPID** intruder alarm system working into the famous **webeyecms** fully monitored automated alarm service, together they offer the world's fastest alarm delivery. Already well established within the professional security industry we're now offering the unique **webeyecms** cloud based service to the domestic security market. We offer an unbeatable delivery time - typically 3 seconds from activation to calling the key holder (smart phone required). Our unique PADARC system automatically checks and balances the process to offer an unprecedented level of security and reliability so you can be assured that when we know, you know!

Alarms received on  
your smart phone in  
typically 3 seconds

Alarms received on  
smart phone or tablet

- ✓ **Easy arm and disarm from your key fob**
- ✓ **Dual Path technology, uses your broadband to send alarms, but if that fails it switches to the optional SIM card**
- ✓ **Unlimited notifications for intrusion, smoke, flood, panic alerts, low battery and mains power failure**

Optional video means you receive a 10 second clip direct to your smart phone

### Whatever your requirements we have the solution

Our super-fast and reliable fully monitored automated alarm system is based around the RAPID IP panel with integrated keypad. The basic system comes as either a blind or visual verification option with the choice of a door contact or the simple arm and disarm function remote control fob. Options at additional cost include a siren, additional internal cameras, external cameras, glass break detectors, panic watch, heat, smoke and flood detectors.

### What makes us better than the rest?

Let's be clear - webeye is neither a self-monitored app with all their associated reliability problems or a manned monitoring station with all the associated expense and potential inefficiencies! **webeyecms** is a fully automated and managed professional monitoring solution, it takes over the role of human beings by automating the alarm receipt, alarm handling and alerting alarm recipients. The system is not limited by human alarm operator capability or errors making it infinitely more reliable. Our automated system can respond to an infinite number of alarms all at the same time. The system calls and alerts the key holder directly - so it is you who can identify if it really is an intruder avoiding expensive false alarms. **webeyecms** will keep calling you until you or one of your designated key holders answers the call for up to 2 hours. The system records and notes all actions should you need them for future reference.

With **webeyeassured** you can track the movement of any intruder in real time around the property on your device. The system is configured in such a way that it will tell you which PIR is activated or provide the sequence of activations i.e. kitchen activated, living room activated, hall activated, bedroom 1 activated, so you could be on your phone relaying this information to the police straight away.

**webeyeassured**

THE FASTEST, MOST RELIABLE AND SECURE FULLY AUTOMATED MONITORED ALARM SYSTEM ON THE MARKET!

## webeyeassured for the home

A quick response is key to catching the criminal in action - the webeye assured alarm system offers complete peace of mind in 5 simple steps.

1

Upon intrusion an alarm is wirelessly sent to your panel from whichever device is activated.

2

Your panel sends the alarm to the **webeye** automated monitoring station where the alarm is processed.

3

**webeye** informs you, your friends and family within seconds. Because **webeye** is automated and unlike a human operator it doesn't get busy or tired and responds **all the time, every time.**

4

Because of the unique way we handle alarms you receive the alarm within seconds to **any number of enabled smart phones** accompanied by a loud siren ring tone. **webeye** monitors the response and **logs whoever answers the call.**

5

If there is no response **webeye** will continue to send alarms every 10 minutes for 2 hours or until the alarm is viewed.

"Ian, your alarm has been activated"

"Hello Simon. Ian's alarm has been activated"

"Hello Helen. Ian's alarm has been activated"

"Hello Jayne. Ian's alarm has been activated"

"Hello Rob. Ian's alarm has been activated"
