INTRODUCING THE NEW
ALL-IN-ONE WEBEYE ALARM
& MONITORING SYSTEM DVR,
NVR OR HYBRID

**Catch
the criminal in
action**

**All-in-one alarm and
monitoring systems with
huge potential savings on
your security bill**

**Easy to install
and maintain**

**Protection 24/7
Unparalleled reliability
and security for the price**

With our ever increasing arsenal to defeat the criminal and create a safer world, webeye has pioneered DVR/NVR alarm systems with revolutionary unique features, such as the ability to arm and disarm from your mobile phone or through your browser. We've incorporated a timeline function so you can immediately pinpoint the time of any intrusion, eliminating the cumbersome need to trawl through hours of video footage. Get all this and much more, for an amazing price.

As we all know shops and businesses can be vulnerable to theft or attack. Until now the only option for most shops and businesses was to buy an alarm system (which can be prone to false alarms) and also install CCTV video cameras with all the associated costs. The new **webeye alarm system DVR/NVR/TVi/Hybrid** means you now have the choice of an all-in-one system that enables you to keep an eye on your business from anywhere in the world using the mobile app or browser. Webeye's unique features and fail safe PADARC* response system means you can be confident, should you have an intrusion, you'll get to know fast.

Unique.

webeye is an ideal security solution; all you need to receive the alarm is a browser or mobile phone. Unique to the **webeye alarm system DVR/NVR/TVi/Hybrid** you can arm and disarm the system from your mobile phone or browser and the complete alarm process is tracked and audited. Webeye can deliver alarms to an unlimited amount of devices.

Reliable.

Once activated the **webeye alarm system webeye alarm system DVR/NVR/TVi/Hybrid** sends a short video clip of your premises directly to your mobile device or browser. The full system is easily installed and allows you to verify any site you might have with the touch of a button and puts them in an alarm status queue. Because webeye alarms are verified via a short video clip within seconds it virtually eliminates false alarms. This has an additional benefit to the emergency services as well; call outs for false alarms costs hundreds of millions of pounds a year.

Unbeatable price.

Given that the **webeye alarm system DVR/NVR/TVi/Hybrid** is an all-in-one solution it costs well below the price of installing a traditional alarm and CCTV cameras. This, along with the additional benefits and unique features, means customers get much more for their money and the ability to protect a number of premises quickly and painlessly.

* Progressive Alarm Delivery and Alarm Response Confirmation

webeye for shops and businesses

A quick response is key to catch the criminal in action - the **webeye alarm system DVR/NVR/TVi/Hybrid** all-in-one solution offers complete peace of mind in 5 simple steps.

- 1** Upon intrusion a video clip is recorded to your **webeye alarm system DVR/NVR/TVi/Hybrid**
- 2** Your device sends a short video clip via the internet to **webeye**
- 3** **webeye** delivers the video clip to you and your designated stakeholders and personnel's smart phones and devices
- 4** You receive the video clip within seconds to your devices with a loud siren ring tone
- 5** If there is no response we will keep trying every 10 minutes for 2 hours, or until the alarm is viewed

The webeye Alarm System offers solutions which all allow you to remotely arm and disarm your system via your smartphone or browser from anywhere in the world. You'll receive video alarm footage as it happens, direct to your mobile device or browser.
