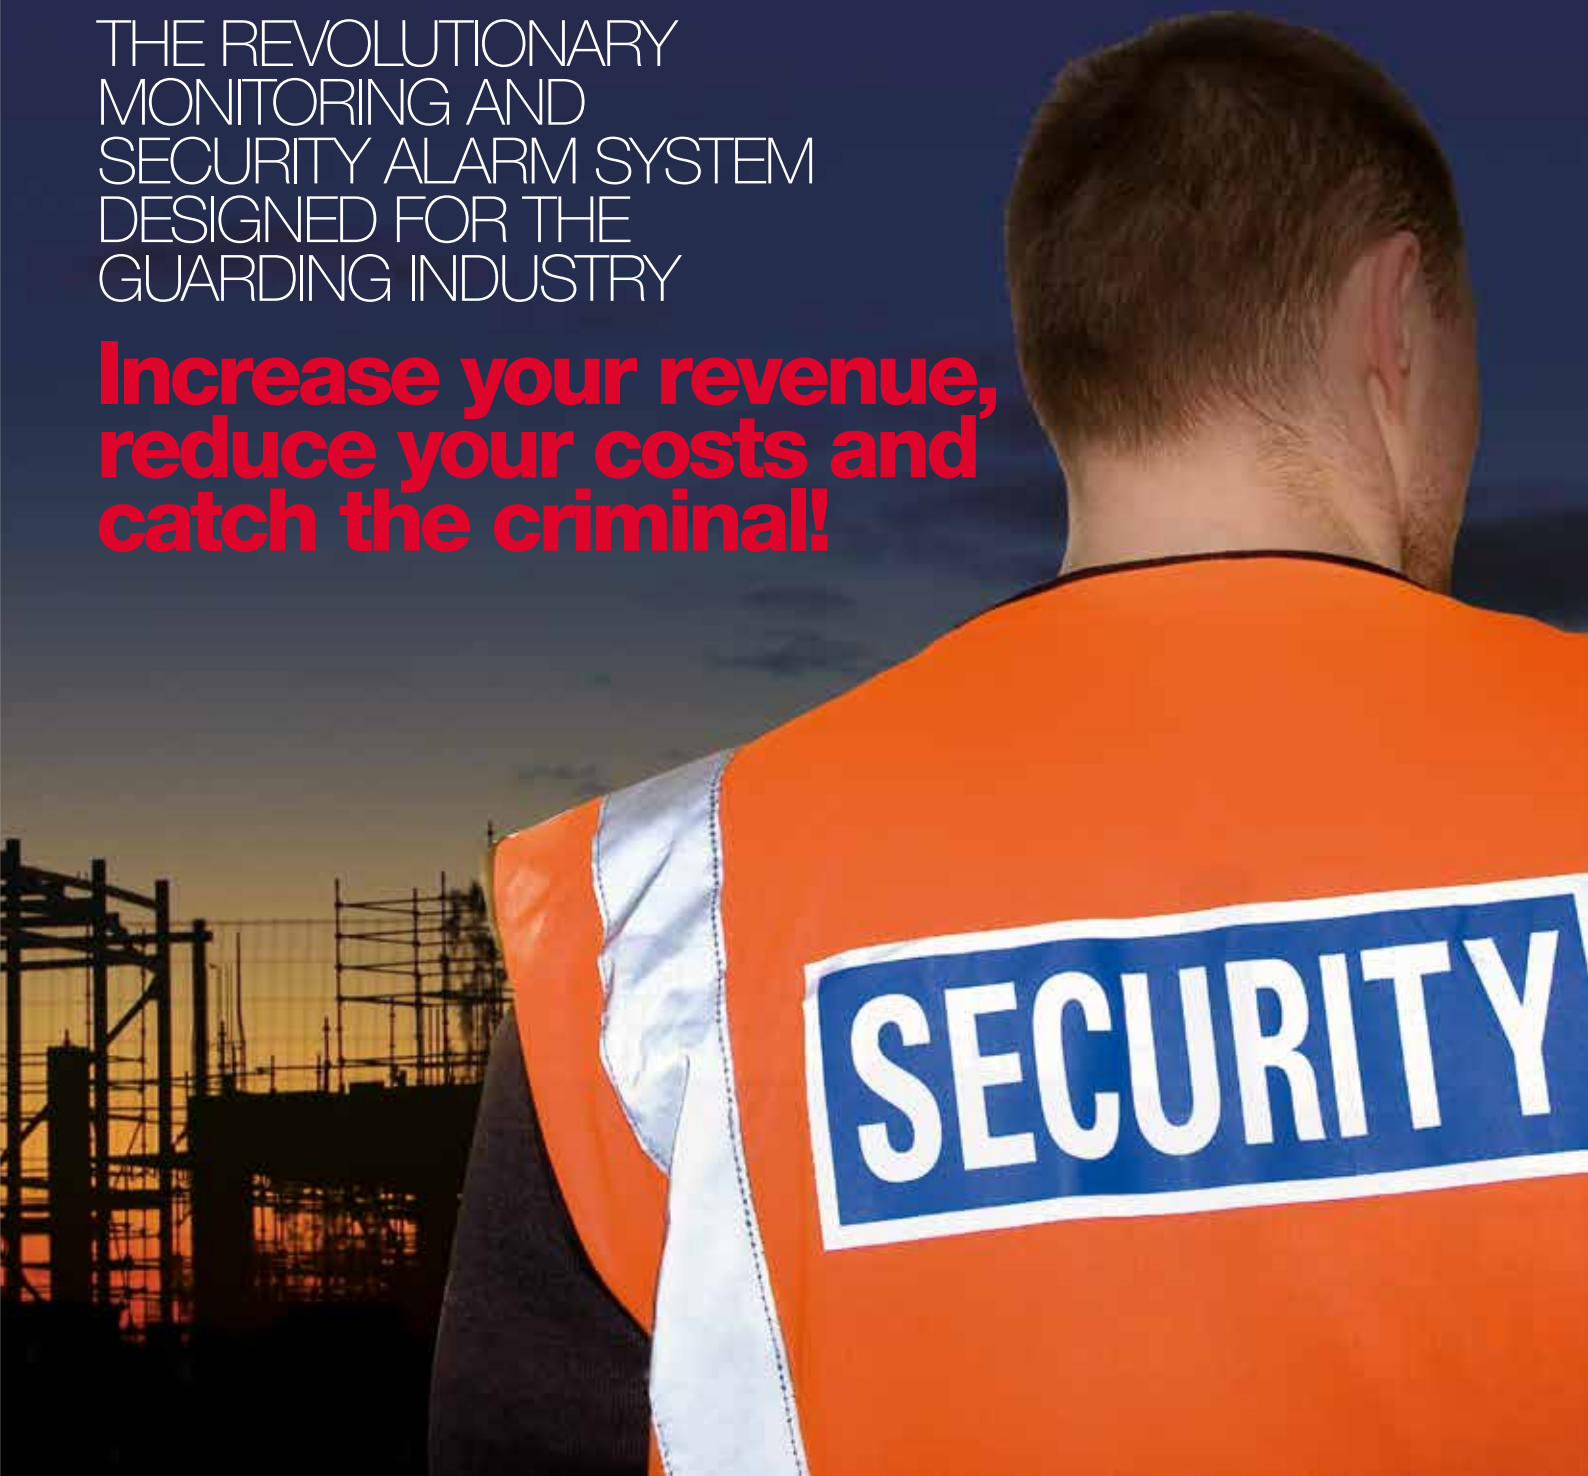
Guarding is changing! See how you could *multiply* your profits!

webeye™ cms

for a safer industry

THE REVOLUTIONARY MONITORING AND SECURITY ALARM SYSTEM DESIGNED FOR THE GUARDING INDUSTRY

Increase your revenue, reduce your costs and catch the criminal!



Introducing the world's ultimate alarm receiving, handling and management platform for the guarding industry.

Whether you operate
locally
regionally
nationally
globally...

...our cloud based alarm management web portal will allow you to provide a world class service for less!

All you need is:

1. **An alarm system integrated into webeye (including video alarms) – *No expensive software infrastructure***
2. **A computer connected to the internet and/or a smart phone or tablet (iPhone or Android) – *No expensive hardware alarm receiving infrastructure***

If you join the webeye revolution:
See your revenue increase!
See your overheads fall!
Provide an even more effective service!
Provide an even more efficient service!

Our system can boast 100% reliability*
Our alarm systems are easy to install, rapidly deployable, inexpensive and robust!

* 100% reliable at time of going to print (June 2015). Typical 90 day period.

The webeye revenue multiplier

See your revenue increase with the same number of staff!

webeye™ cms

Just give your guards a smart phone with the webeye app to save money, increase your efficiency and catch the criminal! Our robust cloud based alarm management web portal working with one of our rapidly deployable wireless video alarm systems will enable you to take on and service more clients without taking on more staff. You'll save on fuel bills too and because webeye is infinitely scalable you'll be able to easily handle an ever increasing workload.

Number of sites serviced by 2 typical guarding teams

Diagram 1.

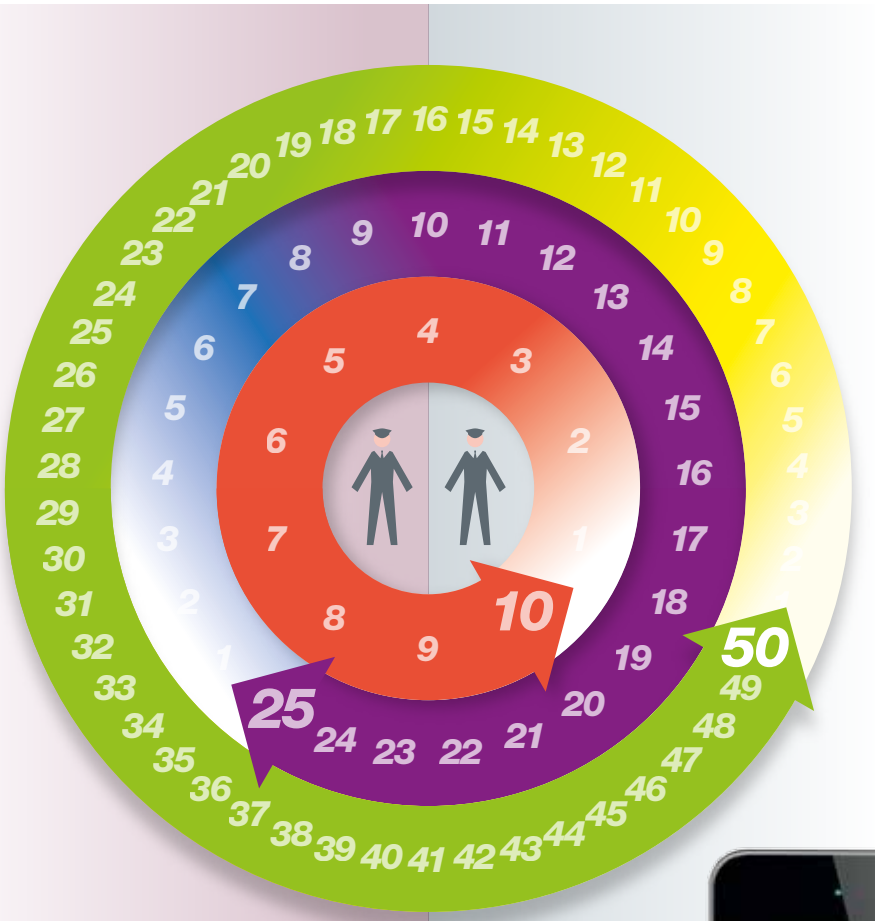
The webeye multiply effect.

2 guarding teams typically schedule 10 rural sites per shift*.

Operate with webeye and teams can respond to alerts along with scheduled visits which means they can more than double the number of sites they service.

Operate a respond to alert only service with webeye along with occasional spot checks and those same 2 teams could service 50 or more sites.

You do the maths!



without webeye =

with webeye =

Scheduled guarding *no webeye* 10

Scheduled guarding + Response on alert *with webeye* 25

Response on alert + occasional spot checks *with webeye* 50

* Based on VDT market research.

The web portal and app is:

- **Simple & straightforward**
- **Configurable & flexible**
- **Robust & reliable**

Already in use around the world our programmers and engineers have done the hard work so you don't have to. The 'it just works' technology means we can boast a service which is 100% reliable* but also managed 24 hours a day, 7 days a week and 365 days a year.

Also ask about webeyesos with the track me function which is the ideal guarding monitoring and tracking tool. Never compromise the Safety Of your Staff
