

100% wirefree security

VIDEOFIED from Webeye is the ideal solution for vacant property security

- ✓ Void/vacant properties
- ✓ Indoor and outdoor protection
- ✓ Video verification
- ✓ Eliminates false alarms
- ✓ Mains free panel and devices
- ✓ Up to 4 years battery life
- ✓ Rapid deployment capability
- ✓ Guard enhancement
- ✓ Simple system arm/disarm

SIMPLE AND COST EFFECTIVE VOID PROPERTY SECURITY

Since vacant sites and properties are uncontrolled environments, video verification is especially important to eliminate costly false alarms. Videofied's portability means it can be deployed rapidly and moved around from site to site.

The indoor and outdoor PIRs have integrated cameras which generate 10 second video clips upon activation.

Videofied products can integrate with the award winning webeyeCMS cloud alarm platform allowing the alarms and video clips to be sent directly to stake holders on their smartphones and/or to a control room where an operator can view and manage alarms through a simple web browser (no expensive hardware or software required). The webeyeCMS platform also contains a full audit trail of who has opened the alarm and when (whether on a smartphone or web browser).

Webeye is alone in providing full training in the installation and operation of Videofied products and offers comprehensive customer support.
